FINANCIAL AND COMMERCIAL.

FRIDAY, April 17. All stock, cotton and produce markets in this country were closed to-day, and in Europe the only exchanges open were in Paris and Berlin. They will also be closed to-morrow.

The banks in this city were open, but no further engagements of gold for expert to Europe were made, and it is unlikely that there will be a continuation of the movement until Monday.

The bank statement, which will be pub

lished as usual to-morrow, is expected to show a gain of about \$12,000,000 in cash. The banks gained \$1,430,000 from the Sub-Treasury to-day. In both Paris and Berlin the trading

during the day was stagnant, but prices

generally showed a slight improvement. THE BUSINESS OUTLOOK.

Easter Brings Liveller Trade but No Permanent Improvement.

The trade reviews report livelier retail business due to Easter, but little permanent improvement. Dun's says:

Easter trade and generally favorable weather accelerated retail distribution of merchandise, but there is no evidence of increased activity in preparation for future business, nor are manufacturers disposed to operate more extensively. In fact some net curtailment of output is noted, and more reductions in wages have occurred, particularly at textile plants.

Prices of commodities are lower at the seading exchanges dealing in farm staples in response to encouraging crop reports, and transactions were reduced by the holidays. There is an increased demand for farm hands. and some disputed wage scales have been signed, but little change can be discerned in the total number of unemployed.

Postponed structural work is started very slowly, although the money market is so easy that gold is being exported in the face of an exceptionally heavy favorable balance on merchandise account. Bradstreet's says:

Easter trade at retail, though affected in sections by unfavorable weather, is on the whole fair. Collections show slight improvement at a few centres and filling in orders by jobbers are a trifle better, but reports from leading industries are no more favorable, rather more weakness is noted in iron and steel and fall trade in leading lines is still disappointingly backward.

The dulness in building lines -- expenditures for the first quarter being 40 per cent. below 1907-affects all lines of materials. and export and import trades are ebbing. indicating the first decrease in foreign trade from the preceding fiscal year noted for five years past. Crop conditions seem to be fully maintained, good progress is being made in seeding corn, oats, cotton and spring wheat and rains in Kansas lead to the hope that preceding deterioration has been checked, leaving winter wheat conditions still well ahead of last year at this date. Fruit crop

prospects are encouraging.

High prices, coincident with Lenten observances, are probably responsible for the smallest sales of neats reported this year. Here, as in all other lines, the expectation of lower prices encourages a waiting tendency on the part of purchasers. The number of idle hands is as large as for some time past, wage reductions curtail buying power and the number of failures continues far ahead of
